» UPS

We offer a wide range of standalone and modular UPS Systems to cover all Commercial and Industrial sectors, ranging from 400VA to 6.4MVA.

» DC Chargers

Our Dc Chargers are based on the most reliable technology in the market to protect the electrical loads against power failure including a wide range of sizes for multi-purpose use from 24VDC up to 220VDC with high flexibility in terms of power, configurations and adaptability to meet the market demands.

POWER

» Central Battery System (CBS)

Our CBS product, as manufactured by Eaton Germany (CEAG) provides reliable and safe illumination - especially in dangerous situations or in case of power failure.

The many years of experience and innovative product developments have enabled EATON CBS product line competent partner for emergency lighting systems through out the world.

» Batteries

We offer several types of reliable, extremely powerful & highly robust batteries for commercial and industrial applications.

POWER

» Earthing & Lightning Protection

Our Earthing product, Provides reliable and innovative solutions that meet international standards.

With a comprehensive range of products spanning earthing systems, lightning protection.

We ensures safety, durability, and trusted performance across critical industries worldwide.

Control Valves For HVAC Applications

» Motorized Valves

Advanced valves that combine flow limitation, differential pressure control, and modulating control in one unit ensuring precise temperature regulation, energy efficiency, and reliable HVAC system performance.

- o PICVs
- o Actuators
- o Bypass Units
- o Differential Pressure Control Valves

Automation Systems

» Lighting Control

Leading global providers of smart lighting solutions, offering energy-efficient, automated, and fully integrated systems for commercial and industrial buildings. Reliable, sustainable, and designed for modern intelligent environments.
